DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Drawings

The drawings are objected to as failing to comply with 37 C.F.R. 1.84(u)(1) that states that "different views must be numbered in consecutive Arabic numerals . . .".

Specifically, Figure 9 depicts three separate views of the Applicant's invention. Each of said views must be identified separately. The labels "Fig. 9a", "Fig. 9b" and "Fig. 9c" would be acceptable. It is noted that if said labeling is used then the drawing description section of the specification need not be amended.

Appropriate correction the Figure 9 is required.

Art Unit: 3653

Allowable Subject Matter

Claims 1-17 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The Examiner considered Patent Number 4,350,239 by Tsuiki to be the prior art most closely related to the Applicant's claimed invention. Although the coin apparatus disclosed by the '239 patent incorporates ratchet 6 that contains a coin within a slot and that reads on the Applicant's disc, said patent fails to disclose or suggest a radially extending tab located on the outer edge of ratchet 6 and located at or near the trailing edge of the coin slot. Said patent does incorporate a portion 8 of the ratchet 6. However, said portion 8 is merely a section of the periphery of said ratchet 6 and does not extend beyond said periphery.

Conclusion

This application is in condition for allowance except for the above-mentioned drawing deficiency. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The following related art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number US 6,253,900 B1 by Watanabe because of its coin receiving portions 20,

Art Unit: 3653

Patent Number 5,954,181 by Schwarzli because of its coin conveyor 40,

Patent Number 5,950,793 by Schwarzli because of its coin conveyor 40,

Patent Number 4,673,074 by McCormick because of its receptacles 16, 18, 20 and 22, and

Patent Number 3,970,181 by Rubio because of its detents 73 and 74.
